

For Immediate Release
**Telrad Introduces Full End-to-End Voice over WiMAX
Solution**

Telrad Networks adds CPEs to Commatch solution

Lod, Israel – December 18, 2007 - Telrad Networks, a veteran developer of carrier-grade telecommunications equipment, today released the Commatch 1000 series of VoIP customer premises equipment (CPE) as part of its offering for Voice over WiMAX.

Commatch 1000 is a generic voice and data CPE, with full interoperability with the Commatch 6004 for immediate provision of all voice services through existing TDM infrastructure.

“We found that our customers were looking for an end-to-end VoIP solution for their WiMAX deployments,” said Rebecca Rachmany, Director of Marketing for Telrad Networks. “Following successful implementations and field trials of our Commatch 6004 solution, Telrad has been able to leverage its expertise to ensure full interop of the entire deployment, with the introduction of the Commatch 1000 series.

The Telrad Commatch 1000 series of VoIP CPEs with the Commatch 6004 V5.2 to SIP access gateway provides the operator a full voice solution with uninterrupted voice connections, while supporting a wide variety of applications, such as G.3 facsimile, payphone, calling line identification (CLI), and CLASS 5 features, including call waiting, call forwarding and other vertical services.

The Commatch 1000 series is designed to support standard SIP protocols, preserving the operator’s investment going forward, when the operator makes the move to a complete IP-based infrastructure with softswitch implementation.

ABOUT TELRAD NETWORKS LTD.: Telrad Networks has been developing carrier-grade communications equipment for more than half a century. Telrad provides development capabilities that focus on integration of core technologies into standardized, Tier-1 carrier-class products. Telrad is devoted to providing a highly flexible development team, allowing its partners and customers a high level of control in the development cycle and product roadmap. Telrad’s Integrated Network Solutions Division provides professional support services and transition from traditional to next generation networks for operators in emerging markets. Telrad is a privately-owned company founded in 1951. For more information, visit www.telrad.com
