

Telrad Networks Partners with Waterfall to Deliver Secure IP Surveillance

Security solution enhances protection against cyber and physical threats

Lod, Israel – Feb 26, 2008 – Telrad Networks, a veteran developer of carrier-grade telecommunications equipment, has announced a partnering agreement with Waterfall Solutions, a leading provider of secure unidirectional connectivity solutions. This partnership is designed to deliver Waterfall's security solution for IP surveillance to global markets. The technology has already been tested in initial live deployments and is now available to public institutions, critical civilian infrastructure, and private corporate or industrial sites worldwide. The solution is applicable to all forms of surveillance including cameras, motion sensors and sound-activated alarms.

"With the inclusion of this solution in Telrad's overall product portfolio, we now offer a more comprehensive and secure technological environment for network planners and integrators," said Rebecca Rachmany, Director of Marketing at Telrad Networks. "IP based surveillance networks require security solutions to protect both critical data and network integrity. This partnership is part of Telrad's ongoing commitment to provide a full end-to-end solution for its customers."

"We have seen a real need in the IP surveillance market for Waterfall Solutions' unique security technology. The opportunity to cooperate with a respected company like Telrad proves that point." said Esti Peshin, CEO of Waterfall Solutions. "Telrad's influence in the security market will give us an opportunity to prove the significance of our product in the most challenging of networks."

ABOUT WATERFALL SOLUTIONS LTD.: Waterfall Solutions Ltd. is the leading provider of secure unidirectional connectivity for Segregated Networks, IP Surveillance Infrastructure and SCADA Systems.
